Low-code platform helps New Orleans 911 deliver fast, coordinated response

The Quick Base low-code platform has helped streamline workflow, connect agency services and deliver operational data for decision-makers.

Auto-dispatched drones send video to responders en route

A drone platform allows dispatchers to automatically send a unit to emergency locations to give responding rescue teams real-time situational awareness as they approach an emergency site.

DHS election security efforts need more work, IG says

Staff shortages are making it difficult for the Department of Homeland Security to coordinate with states on securing the nation’s election infrastructure, the agency's inspector general said.

Has facial recognition outpaced existing law?

The use of facial-recognition technology by law enforcement agencies may have outpaced the regulations that govern it, lawmakers suggest.

Responders test FirstNet in rescue exercise

Virginia and Maryland responders participated in a search and rescue exercise that tapped FirstNet's mobile communication links.

NIST updates guidance for authenticating responders

The National Institute of Standards and Technology has revised its guidance for single sign-on for mobile public safety applications.

Hackers seek ransoms from Baltimore and communities across the US

Thinking ahead and taking protective steps can help reduce the effects of cybersecurity incidents on both individuals and organizations.
